32

Figure 1. A schematic diagram of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard training program, while the experimental group received a modified training program. The results of the training program were compared between the two groups.

Q. Now, you said that you were not sure whether or not you were talking to the person who was the driver of the car that was involved in the accident, is that correct?
